*Allowable Subject Matter*

1. Claims 21, 23 and 25-27 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach a method for operating a data communication service in a mobile communication system, the method comprising:

Setting the reject data to a pending status in the user equipment; and checking whether the reject data has been set in the user equipment in the pending status when the user equipment requests the data communication service in a home area of the first mobile switching center; and determining whether the user equipment has been registered in the first mobile switching center when the reject data has been set in the user equipment in the pending status as substantially described by independent claim

21. These limitations, in combination with the remaining limitations in claim 21 are not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
